

Indobase

The Agentic Business OS — build, deploy, transact, measure, and market with agents.

India-hosted · DPDP-ready · Rupee pricing · Vyom infra · One SSO

The Problem

Indian businesses run on
ten disconnected tools — not an operating system.

Build, billing, analytics, email, and deploy each live in a different product. Agents have nowhere to run the whole business.

The Solution

One platform runs the business — agents orchestrate across build, backend, billing, and growth.

Agentic runtime

Agents build apps, wire auth & DB, deploy, and operate marketing — not just codegen.

Native products

Owned Payments & Analytics — first-class, not bundled third-party glue.

India stack

Vyom-hosted, DPDP-ready, rupee SaaS — one procurement decision for SMBs.

The Product

One OS: agents run build, backend, billing, analytics, and growth.

AGENTIC CORE

 Builder — agentic apps	 Studio — backend & auth	 Deploy — *.indobase.in
--	---	--

NATIVE OWNED PRODUCTS

 NATIVE Payments — payments.indobase.in	 NATIVE Analytics — analytics.indobase.in
---	---

MARKETING SUITE

 Email	 Social	 Design	 Video
--	---	---	--

Why Now

Agentic AI wave
Agents need an OS to act — orchestration beats point tools and codegen-only wedges.

India digital acceleration
MSMEs digitizing fast; they need one rupee-priced stack, not ten USD subscriptions.

DPDP enforcement window
Data residency and compliance are procurement gates — India-hosted becomes default.

Rupee SaaS appetite
Founders and agencies want native billing, analytics, and deploy under one SSO.

Market Opportunity

India gap: local hosting, rupee billing, DPDP alignment vs US-priced point tools

Competition

Agentic OS · Native Payments & Analytics · India-hosted · One SSO

	AGENTS / BUILD	BACKEND	PAY + ANALYTICS
Point tools	~ One job	✗ Separate	✗ Third-party
AI-only builders	✓ Codegen	✗ None	✗ Integrations
Backend-only	✗ Manual	✓ APIs/DB	~ Plugins
Website builders	~ Static	✗ None	✗ Add-ons
Indobase	✓ Agentic OS	✓ Studio	✓ Native both

How It Works

One flywheel — agents run the loop, data stays in the OS

Builder + Studio → deploy on *.indobase.in → native Payments checkout → native Analytics → Email / Social / Design / Video — all under Studio SSO

Traction

EARLY STAGE · PRODUCTION LIVE · INDIA-HOSTED

- ✓ **Agentic OS live** — Builder, Studio, Email, Social, Design, Video on indobase.in
- ✓ **Native Payments** — payments.indobase.in billing & checkout in ecosystem SSO
- ✓ **Native Analytics** — analytics.indobase.in product metrics wired to projects
- ✓ **Multi-tenant data plane** — dedicated per-project databases on paid plans
- ✓ **Deploy pipeline** — agent build → *.indobase.in or custom domain

MEASURING (NOT CLAIMING)
OS activation · Pro conversion · Payments attach rate · Analytics adoption · Agency pipeline

Business Model

Free ₹0 Builder · 5 prompts	Basic ₹499/mo Domain & badge	Pro ₹1,999/mo Studio unlocked	Studio ₹6,999/mo Teams & agencies
--	---	--	--

- **Subscriptions** — primary revenue; Pro unlocks OS backend, Studio adds team & client workflows
- **Native product attach** — Payments checkout & Analytics seats deepen ARPU within SSO
- **Future usage revenue** — LLM compute, transaction fees, enterprise infra — layered on core plans
- **Enterprise** — dedicated infra, SLA, DPDP compliance packages (custom pricing)

Go-To-Market

- 01

Product-led growth — free Builder → deploy → backend wall → Pro conversion. Self-serve upgrade at ₹1,999/mo.
- 02

Agency channel — Studio plan for client projects; native Payments & Analytics as upsell within SSO.
- 03

India SMB motion — founder content, rupee pricing, DPDp-ready hosting as procurement wedge vs US tools.
- 04

Ecosystem lock-in — one Studio identity across Builder, Payments, Analytics, Email, Social, Design, Video.

Why Indobase

Moat: the OS agents run on — not another app builder

- 01

Agentic Business OS — build, deploy, transact, measure, and market in one runtime. Agents orchestrate across products.
- 02

Native Payments & Analytics — owned billing (payments.indobase.in) and product analytics (analytics.indobase.in), not third-party glue.
- 03

Deploy graph — every project on *.indobase.in with auth, DB, and marketing suite wired — switching cost grows with usage.
- 04

India compliance bundle — Vyom-hosted data, DPDP-ready posture, rupee billing — one procurement decision.

Pricing

Pro unlocks the OS backend — that's the upgrade moment

PLAN	PRICE	WHAT YOU GET
Free	₹0	Builder · 5 prompts · deploy to *.indobase.in
Basic	₹499/mo	Vanity tier — custom domain & badge only (no Studio backend)
Pro HERO	₹1,999/mo	Studio unlocked — auth, DB, APIs, Payments & Analytics SSO, dedicated project DB
Studio	₹6,999/mo	Team seats · client projects · full marketing suite · higher limits
Enterprise	Custom	Dedicated infra · SLA · DPDP compliance · custom integrations

Who It's For

Founders

Run the whole business on one OS — build, bill, and measure without tool sprawl.

Agencies

Ship client apps with native Payments, Analytics, and marketing suite under Studio SSO.

SMBs

Replace ten SaaS subscriptions with one India-hosted platform agents can operate.

Product teams

Prototype in Builder, productionize in Studio — checkout and analytics already wired.

Team

Siva
CEO
Built & scaled Peaq Technologies; product vision & India GTM from Chennai.

Roshan Raghavander
CTO
Shipped full Indobase platform — multi-tenant infra, Builder, Studio, marketing suite. Ex-GARP ML.

Fernando Cabal
COO
30+ yrs hybrid cloud & KBs at scale. Splunk-certified ops leader, Montreal.

Roman S.
CIO
19+ yrs cybersecurity & DevSecOps. Schneider Electric; founded Savka Technologies.

Prabhu Marimuthu
CRO
18 yrs enterprise sales & IoT GTM across India and North America.

The Ask

Raising \$3M for 20% equity

Post-money valuation: \$15M implied · Seed / Series A

- Accelerate Agentic Business OS GTM — PLG, agency channel, India SMB motion
- Scale agent infra & native Payments / Analytics attach across the ecosystem
- Enterprise sales & DPDP compliance packages for India procurement cycles

Use of Funds

\$3M deployment over 18 months

40%	Engineering	Agent runtime, Studio, native Payments & Analytics, marketing suite GA	
30%	Go-to-market	PLG funnel, agency partnerships, India founder content, sales hires	
20%	Infra & LLM	Vyom scaling, multi-tenant data plane, agent compute & model costs	
10%	Ops & compliance	DPDP readiness, legal, finance, customer success	

Exit Strategy

Strategic acquisition Vertical SaaS platforms, cloud providers, and fintech acquirers seeking India-native OS + payments + analytics stack under DPDP compliance.	Public markets IPO path on India exchanges (BSE/NSE) or US listing as ARR scales — rupee SaaS + agentic platform category maturing globally.
--	---

Comparable categories: vertical SaaS platforms, developer infra, and India fintech SaaS — businesses with embedded payments & multi-product ecosystems command premium strategic value.

Roadmap & Milestones

18-month goals — honest targets, not claimed metrics

KEY MILESTONES

Q1-Q2	Scale paying Pro users via PLG — Builder free → OS backend → Payments & Analytics attach
Q2-Q3	Agency & Studio adoption — 10+ partners running client businesses on the OS
Q3-Q4	Marketing suite GA — Email, Social, Design, Video fully agent-orchestrated in SSO
Y2	Enterprise pilots — DPDP packages, dedicated infra, SLA, agent governance
